

# Newsletter – Pitt Street Station

December 2020

## Sydney Metro is Australia's biggest public transport project.

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central.

In 2024, Sydney will have 31 metro railway stations and a 66 kilometre standalone metro railway system. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

CPB Contractors (CPB) will deliver the new Sydney Metro Pitt Street Station in the Sydney CBD.

### **Pitt Street Station construction work to commence**

CPB began site establishment and service investigation and installation work in mid-November 2020.

From **Monday 4 January** day and night work will continue for construction of the integrated station development.

#### **January work will include:**

- day work to excavate a crane base within the site compounds ahead of the delivery of cranes into the North and South sites in February and March
- scanning surveying, saw cutting and potholing existing utility services and placing markings on the ground to identify underground services
- road and footpath trenching for the installation of power services to the site compounds
- delivery and installation of construction site hoarding, site sheds and delivery of equipment
- temporary parking lane and short term lane closures around the work areas
- temporary partial pedestrian footpath closures with alternative routes provided.
- delivery and installation of construction site hoarding, site sheds and delivery of equipment.

#### **Standard work hours**

Standard work hours are **Monday to Friday, 7am to 6pm and Saturday, 8am to 1pm.**

Some January work will be undertaken outside of standard construction hours.

#### **Out of hours work**

Due to high daytime traffic volumes and the need to ensure pedestrian safety, some of this work will need to be completed outside standard construction work hours. A community notification containing further details of work outside of standard construction hours will be delivered to properties ahead of the work along with email updates sent to the subscribed stakeholder distribution list.

#### **What to expect**

- Equipment used will include, but is not limited to, electric tools, power drills, cranes, lighting towers, light trucks, delivery trucks and traffic control.
- **Some of this work will be noisy.** The project team will take every step possible to minimise noise impacts. A range of mitigation measures are in place to meet the project's approval conditions and reduce noise such as using only the necessary equipment for each task, turning off equipment when not in use and equipping all machinery with non-tonal movement alarms.
- Temporary traffic and pedestrian changes may be required for large vehicle deliveries, including traffic control, for the safety of the community. Access to properties will be maintained at all times during the work.

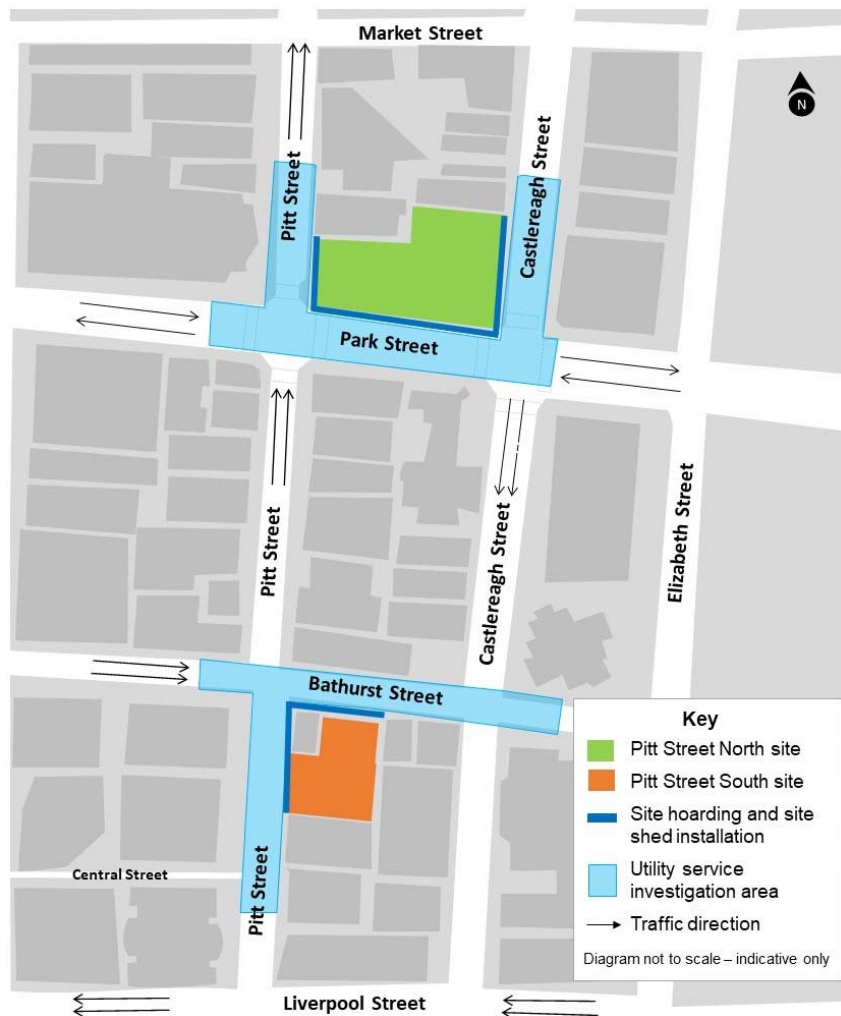

## Upcoming work and temporary traffic changes

A temporary weekend road closure is being planned on **Sunday 10 January** to allow for oversized equipment to be delivered into the site compounds. This will involve a temporary road closure on Castlereagh Street between Market and Park streets and on Pitt Street between Bathurst and Liverpool streets for the North and South sites respectively.

A community notification with detailed information on the confirmed date and times will be delivered to nearby properties a minimum of seven days prior the closure date and communicated through emails to members of the subscribed project stakeholder email distribution list.

If you are not currently subscribed to receive project updates via email and would like to, please provide your name and email address to [pittstreetmetro@transport.nsw.gov.au](mailto:pittstreetmetro@transport.nsw.gov.au) and ask to be added to the email distribution list.

## Pitt Street Station construction work from 4 January 2021

**Thank you for your cooperation and understanding while we complete this essential work.**
