

# Pitt Street Station

June 2021

## Sydney Metro is Australia's biggest public transport program

Services started in May 2019 in the city's North West with a train every four minutes in the peak. Metro rail will be extended into the CBD and beyond to Bankstown in 2024. There will be new CBD metro railway stations at Martin Place, Pitt Street and Barangaroo and new metro platforms at Central.

In 2024, Sydney will have 31 metro railway stations and a 66 kilometre standalone metro railway system. There will be ultimate capacity for a metro train every two minutes in each direction under the Sydney city centre.

Pitt Street Station is situated within the CBD, largely surrounded by high-rise commercial and residential buildings. The station will run beneath Pitt and Castlereagh streets, and will have two entrances that connect to the platforms via pedestrian tunnels.

## Out of hours work

Standard construction hours are Monday to Sunday, 7am to 6pm.

Due to high daytime traffic volumes and the need to ensure pedestrian safety, some work will need to be completed outside of standard construction work hours. This work is expected to take up to **15 shifts** on the North site and up to **10 shifts** on the South site to complete (weather permitting) from **Tuesday 1 June to Wednesday 30 June 2021, 6pm to 7am**.

Plant and material deliveries will take place into the sites between 6pm and 7am. The tower crane will be used to lift material from the parked delivery vehicles and place it inside the site. This activity is not expected to generate high levels of associated noise.

Essential site operation work will take place 24 hours a day, 7 days a week. This includes dewatering of the site and underground ventilation fan operation.

## Out of hours activities will involve:

- material deliveries into the site compounds to be used for station construction
- railway sleeper deliveries into the North compound
- delivery and installation of site hoarding graphics and signage
- rectification work to site sheds and hoarding, if required
- use of the tower cranes and hoists used to move material and workers from street level to the base of the site shaft
- large concrete pours that cannot be completed during standard construction hours from 7am to 6pm
- delivery and removal of oversized plant from the site compounds
- investigation of underground services on Pitt, Park, Bathurst and Castlereagh streets adjacent to the sites
- steel fixing and formwork within the base of the station shafts
- operation of dewatering units and of ventilation fans within the base of the site compounds
- temporary vehicle and pedestrian traffic changes including lane closures and footpath diversions.

Please subscribe to project email updates to be kept up to date on the work schedule date. You can subscribe by providing your email address to [pittstreetmetro@transport.nsw.gov.au](mailto:pittstreetmetro@transport.nsw.gov.au)

# Out of hours work in June

## What to expect during out-of-hours work in June

- Equipment used will include, but is not limited to, rattle gun, powered hand tools, road saw, tower crane, hoist, elevated work platform, vacuum truck, concrete truck, agitator, vibrator and pump, lighting towers, light vehicles, hiab trucks, dewatering units and of ventilation fans and delivery vehicles.
- Traffic control and directional signage will be in place for the safety of workers and the community.
- Pedestrian footpaths will be closed in some instances, with alternate routes provided.
- Pedestrian and vehicle access to properties will be maintained at all times.
- **Some of this work will be noisy.** The project team will take every step possible to minimise noise impacts. A range of mitigation measures are in place to meet the project's approval conditions and reduce noise such as using only the necessary equipment for each task, turning off equipment when not in use and equipping all machinery with non-tonal movement alarms.

**Thank you for your cooperation and understanding while we complete this essential work.**
